

Governance Comparison of EOS and Telos

Ratification

Telos	EOS
Ratify/Amend is implemented at launch. Any governance document can be submitted for ratification or amendment on a clause-by-clause basis.	Ratification is not yet implemented. A process has been proposed.

Worker Proposal System

Telos	EOS
WPS is implemented at launch. Any user can propose a project that token-holders can vote on without a board required to approve it.	Worker Proposal System is not yet implemented. A process has been proposed that includes an appointed board to oversee proposals.

Arbitration

Telos	EOS
Arbitration is managed by smart contract. Arbitrators are elected by token-holders.	Arbitration is by ECAF. Arbitrators are appointed.

Block Producer governance

Telos	EOS
Block producers are governed by regproducer contract which lists BP prohibited actions, penalties for infraction, and method of enforcement.	Block producers are governed by regproducer contract which lists BP prohibited actions only, without mention of penalties or enforcement method.

Constitution

Telos	EOS
Telos Blockchain Network Operating Agreement (TBNOA) clearly defines elements of blockchain and its operation.	Current EOS Constitution is interim.

Arbitration Rules

Telos	EOS
Telos Blockchain Network Arbitration Rules and Procedures (TBNARP) describes all elements of arbitration. Minimum requirements apply to arbitrators. Most candidates are legal professionals.	ECAF rules and Arbitration workbook (unreleased) describe arbitration process. Arbitrators are not legal professionals. No minimum requirements are published.
